Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 – in line 12, a “secondary axis of rotation” has been set forth. However it appears that the spin assisting component would have the same “axis of rotation” as the shaft because the spin assisting device does not rotate about the longitudinal axis of the spin assisting device itself but rotates about the longitudinal axis of the shaft.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 6, 8, and 9 rejected under 35 U.S.C. 102(e) as being anticipated by Uribe (6,203,491).

Claim 6 – the shaft, conical head, base with a curved face and flat surface, and spin assisting component.

Claim 8 – element -36- is a generally cylindrical projection.

Claim 9 – a portion of element -36- is located in a generally cylindrical recess.

Claims 6, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Dabney(6,059,717).

Claim 6 - the shaft, conical head, base with a curved face and flat surface, and spin assisting component.

Claim 8 – the spin assisting component is a generally cylindrical projection.

Claim 9 – a portion at least a portion of the spin assisting component is located in a generally cylindrical recess because it extends into the device.

Allowable Subject Matter

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-5 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or fairly suggest apparatus having the structure as claimed formed from the particular material as claimed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 3,996,930; 6,394,939; 5,817,037; and Des. 272,090 teach related body contacting structure.
